Artificial intelligence (AI) is intelligence demonstrated by machines, unlike the natural intelligence displayed by humans and animals, which involves consciousness and emotionality. The distinction between the former and the latter categories is often revealed by the acronym chosen. 'Strong' AI is usually labelled as AGI (Artificial General Intelligence) while attempts to emulate 'natural ...

La inteligencia artificial (IA) es la inteligencia llevada a cabo por máquinas. En ciencias de la computación, una máquina «inteligente» ideal es un agente flexible que percibe su entorno y lleva a cabo acciones que maximicen sus posibilidades de éxito en algún objetivo o tarea. [1] Coloquialmente, el término inteligencia artificial se aplica cuando una máquina imita las funciones ...

There's a lot of interesting data in the recent PEW poll on public attitudes to gene editing research, though it's really just the increasing intelligence part (4th column) that's of civilizational significance. Gene editing for IQ is still a philosophical discussion at this stage, despite very fast progress in the relevant fields.
